Sample JASA Article

Author One,[1] Author Two,[1] Author Three,[1] Author Four,[2, a] and Author Five[3]

[1]*Department1, University1, City, State ZipCode, Country*

[2]*Department2, University2, City, State ZipCode, Country*

[3]*Department3, University3, City, State ZipCode, Country*

(Dated: 26 July 2017)

1   Put your abstract here. Abstracts are limited to 200 words for regular articles and

2   100 words for Letters to the Editor. Please no personal pronouns, also please do not

3   use the words "new" and/or "novel" in the abstract. An article usually includes an

4   abstract, a concise summary of the work covered at length in the main body of the

5   article.

[a] author.four@university.edu; Also at Another University, City, State ZipCode, Country.

I.   INTRODUCTION

This sample document demonstrates the use of JASAnew in manuscripts prepared for

submission to the Journal of the Acoustical Society of America.

See JASAdocs.pdf, which is part of this package, for extensive documentation on using

commands for JASAnew.

You can compare the .tex version of this file with the resulting .pdf version to give you

an idea of what commands are available and how they work. At the top of the .tex file

you'll find a listing of the documentclass options, and an explanation of their results. Some

additional suggestions are included in the body of this manuscript.

Beginner Latex users should refer to their favorite online documentation. A useful place

to start is the primer from the TeX Users Group https://www.tug.org/twg/mactex/

tutorials/ltxprimer-1.0.pdf

II.   TRACK CHANGES

ASA prefers that the Track Changes commands only be used to track revisions.

A.   Using track changes commands

Track changes commands will work only when the option \trackchanges is used:

\documentclass[preprint,trackchanges]{JASAnew},

and only when the 'preprint' option has been used.

24 Using the option 'trackchanges' to the 'preprint' documentclass

25 (\documentclass[preprint,trackchanges]{JASAnew})

26 activates the commands, \added{}, \deleted{} and \replaced{}{} to mark changes that

27 we've made.

B. Available track changes commands

29 To add words, \added{<word added>}

30 To delete words, \deleted{<word deleted>}

31 To replace words, \replace{<word to be replaced>}{<replacement word>}

32 To explain why change was made: \explain{<explanation>}

C. Available option for track changes commands

34 Comments can be used for additional information to the author, perhaps a date, or the

35 editor's initials, or more text.

36 To add comment when adding words, \added[comment]{<word added>}

37 To delete words, \deleted[comment]{<word deleted>}

38 To replace words, \replace[comment]{<word to be replaced>}{<replacement word>}

39 To explain why change was made: \explain[comment]{<explanation>}

D. End of document, 'list of changes'

At the end of the document, use `\listofchanges` is called by `\end{document}`. It will list the changes and the page and line number where the change was made.

When final version, `\listofchanges` will not produce anything, `\added{}` word will be printed, `\deleted{}` will take away the word, `\replaced{}{}` will print only the 2nd argument. `\explain{}` will not print anything.

E. Samples of track changes

This shows 'added': (Added: This was added to the text)

Here is an example of deleted in the body of a paragraph. (Deleted: ~~This was deleted~~ ~~from the text~~)

←Redundant sentence, better without it. Do you mind? – JC

We replaced (Replaced: ~~XYZ~~ replaced with: ZYX)

At the end of the document, use `\listofchanges` is called by `\end{document}`. It will list the changes and the page and line number where the change was made.

If 'trackchanges' is not an option, `\listofchanges` will not produce anything. `\added{xyz}` will put 'xyz' in the text; `\delete{zzz}` will produce nothing; and `\replace{abc}{def}` will leave 'def' in your text.

F. Add comment for the change?

If you want to add a name to identify who made the change, or any other comment, you can use `[]` to enter a comment, i.e.,

59 \added[Amy, Feb 2, 2017]

60 {This was added to the text}.

61   ([Amy, Feb 2, 2017] Added: This was added to the text)

62   ([Not really necessary] Deleted: ~~This was deleted from the text~~)

63   We replaced ([(written backwards originally)] Replaced: ~~XYZ~~ replaced with: ZYX)

III. CONCLUSION

65   And in conclusion. . .

ACKNOWLEDGMENTS

List of Changes

Added: This was added to the text, on page 4, line 47.

Deleted: ~~This was deleted from the text~~, on page 4, line 48.

Replaced: ~~XYZ~~ replaced with: ZYX, on page 4, line 50.

Added: [Amy, Feb 2, 2017] This was added to the text, on page 5, line 61.

Deleted: [Not really necessary] ~~This was deleted from the text~~, on page 5, line 62.

Replaced: [(written backwards originally)] ~~XYZ~~ replaced with: ZYX, on page 5, line 63.
